PROJECTS

Emergency First Aid Caring Assistant Robot *2025*

- Designed and built a movable robot prototype to deliver first aid supplies and monitor victims via Wi-Fi camera.
- Integrated gas-level detection sensors; robot controlled remotely via IoT for use in hazardous environments.
- Targeted deployment in emergency scenarios such as mining accidents and fire zones.

Atom Global – Official Website *2025*

- Developed the company's official website using WordPress with Payload CMS API for dynamic content.
- Implemented MongoDB for backend database management and ensured responsive, optimized design.
- Collaborated with team members to deliver a polished, user-friendly UI/UX experience.

OSPYTECH-Full Stack Website *2026*

- Built a modern full-stack web application using Next.js with server-side rendering and SEO optimization.
- Integrated Sanity CMS for dynamic content management and Firebase for authentication and data handling.
- Developed responsive, visually appealing UI with a focus on performance and user experience.
