WORK EXPERIENCE

Full Stack Developer *Oct/2025 – April/2026*
Atom Global

- Developed and maintained real-world web applications using WordPress, React, and Next.js.
- Built responsive, accessible UI components and integrated them with RESTful backend services.

- Managed dynamic content using Payload CMS and handled database operations with MongoDB.
- Collaborated in a team environment following clean code practices and full-stack development workflows.

Shopify Developer | UI/UX Designer
April/2026 – Oct/2026

Volpea Solutions (PSEB)

- Developed and customized Shopify themes using Liquid, HTML, CSS, JavaScript, and Theme Editor.
- Built responsive e-commerce replicas and custom sections with pixel-accurate UI/UX.
- Developed advanced PDPs, cart drawers, product galleries, swatches, sliders, carousels, and interactive video components.
- Built Shopify Checkout UI Extensions, including reservation timers and Trustpilot-style review sliders.
- Developed Shopify Discount Functions using JavaScript and GraphQL with customer-based discount logic.
- Worked with Metafields, Metaobjects, Customer Segments, Discounts, and Shopify Flow.
- Designed responsive UI/UX prototypes in Figma.

PROJECTS

Emergency First Aid Caring Assistant Robot *2025*

- Designed and built a movable robot prototype to deliver first aid supplies and monitor victims via Wi-Fi camera.
- Integrated gas-level detection sensors; robot controlled remotely via IoT for use in hazardous environments.
- Targeted deployment in emergency scenarios such as mining accidents and fire zones.

Atom Global – Official Website *2025*

- Developed the company's official website using WordPress with Payload CMS API for dynamic content.
- Implemented MongoDB for backend database management and ensured responsive, optimized design.
- Collaborated with team members to deliver a polished, user-friendly UI/UX experience.

OSPYTECH-Full Stack Website *2026*

- Built a modern full-stack web application using Next.js with server-side rendering and SEO optimization.
- Integrated Sanity CMS for dynamic content management and Firebase for authentication and data handling.
- Developed responsive, visually appealing UI with a focus on performance and user experience.

Comfort – Shopify Store Replica *2026*

- Recreated the Comfort e-commerce store using Shopify theme customization with Liquid, HTML, CSS, and JavaScript.
- Customized responsive layouts and product pages to closely match the original store's design and user experience.
- Implemented interactive storefront elements while maintaining a consistent, user-friendly shopping experience.
